

Matthew Browne

Professor, Central Queensland University

m.browne@cqu.edu.au • 07 4150 7002 • 0412 561 993

Qualifications: B.Beh.Sc (Hons) PhD

Profile

Professor Matthew Browne is a research professor at Central Queensland University, based in the Experimental Gambling Research Laboratory. He holds a PhD in psychophysiology and quantitative methodology (Griffith University, 2002) and first-class honours in behavioural science.

His primary expertise is in quantitative research methods, psychometrics, and statistical and epidemiological modelling applied to health and social science. Since 2011 he has applied these methods to the measurement of gambling-related harm. He led the research program that reframed gambling harm as a public health outcome measurable across a continuum of the population, rather than as a clinical attribute of a small group of “problem gamblers”. Its outputs include the conceptual framework and taxonomy of gambling harms (Langham et al., 2016); the burden-of-harm methodology used to estimate gambling harm in Victoria, New Zealand and Australia nationally; the Short Gambling Harm Screen and the Gambling Harms Scales (GHS-10, GHS-20, GHS-10-AO, GHS-20-AO), which are benchmarked to health-state utility and are used in government prevalence surveys in Australia and internationally; and evidence on the distribution of harm across risk categories, including the application of the prevention paradox to gambling.

He has led or co-led the design, analysis and reporting of major jurisdictional gambling prevalence and social-cost studies for the governments of New South Wales, Victoria, Tasmania, South Australia, the Australian Capital Territory and New Zealand, and for Gambling Research Australia. He advises PhD, master’s and honours students in the psychology program and acts as consulting statistician across a range of disciplines.

Areas of Expertise

- Measurement and quantification of gambling-related harm, including instrument development, validation and benchmarking to health-related quality of life
- Population-level estimation of gambling harm prevalence, distribution and burden
- Economic and social cost estimation of gambling harm
- Harm to affected others, including family members and children
- Relationships between gambling product characteristics (electronic gaming machines, online wagering, simulated gambling) and harm
- Wagering marketing, inducements and their behavioural effects
- Survey methodology, sampling and weighting for population-representative research
- Psychometrics, structural equation modelling, causal inference from longitudinal data, and applied statistics

Education

- Doctor of Philosophy (Ph.D.), Griffith University, Mt Gravatt, Brisbane, Australia, 2002.
- Bachelor of Behavioural Science (B.Beh.Sc), first class honours, Griffith University, Mt Gravatt, Brisbane, Australia, 1998.

Employment

- **2011–present:** Professor, School of Health, Human, & Social Sciences, Central Queensland University. Formerly Associate Professor, Senior Lecturer, and Lecturer.
- **2008–2010:** Director, Arden Architectural.
- **2009–2010:** Principal Research Fellow, CoastalCOMs.
- **2006–2008:** Research Scientist, Commonwealth Scientific and Industrial Research Organisation.
- **2004–2006:** Research Fellow, Griffith University.
- **2003–2004:** Research Fellow, FhG GMD-JRL - Fraunhofer-Gesellschaft Japan Research Laboratory.

Research Standing and Impact

- Publications: 275 (peer-reviewed articles, book chapters, and commissioned government reports).
- Citations: 10,822 (Google Scholar, as at 17 September 2026); h-index 55; i10-index 176.
- Funded research projects: 65.
- Total research funding: \$30,904,000.
- Named in the Stanford University–Elsevier *World’s Top 2% Scientists* list (2025 edition), ranked among the top 200 researchers in his field.
- Research funding has been obtained predominantly from government departments, statutory regulators and public research funding bodies, including the Australian Communications and Media Authority, Gambling Research Australia, the New Zealand Ministry of Health, and the responsible gambling agencies of New South Wales, Victoria, Tasmania, South Australia, Queensland and the Australian Capital Territory.

Advisory and Expert Engagement

Professor Browne has provided expert advice and technical input to Australian and New Zealand government departments, statutory gambling regulators and public inquiries in connection with the commissioned research programs listed under Research Funding. He has also provided advice on legal cases, including class action proceedings.

Public Engagement

Co-host of *Decoding the Gurus* with Chris Kavanagh, Associate Professor of Psychology at Rikkyo University, an educational, entertaining and lighthearted podcast that analyses public intellectuals and online influencers through a psychosocial and anthropological lens, with particular attention to how they persuade and influence.

Research Funding

2026

- **\$49,000** (CAT2): Russell, A. M. T. & **Browne, M.** (2026). South Australia prevalence study analysis and reporting. Gambling Harm Support SA.
